## The Challenge

**Always tell and keep a good memorable story in people's live.**

Any Image is a Dutch wall décor producer, based in the center of Amsterdam.

**The world of trends, art and design** - At Any Image, worlds, the unique digital enhancement of stock images for several large home & living brands in combination with the right communication, full administration, logistics and follow up of projects with business clients from all around Europe with a tightly organised production processes were my responsibilities.

## Digital Art

Each image a story. Each design a challenge.

In each of the following images I applied the digital collage technique using Photoshop. Different layers with colors, real photographs and filters merge to create a new and unique image that can be appreciated on different physical supports, helping to compose new and attractive environments.

Entering here the WALL DECORATION of our lives.

## Insurrection

**Bold, daring and elegant at the same time.** This was the challenge for the elaboration of this table. The bench and black are a classic of the elegant. **The challenge:** a woman smoking in the middle of the street without fear of anything, showing who she is and what she is capable of. The smoke, represented by strongly striking colors, handles and communicates them at will. Force takes it from the outside, manifests it inside and expels it with great vigor. Without a doubt, **a celebrity among celebrities.**

## Candy Lady

**Old and new.** A touch of humor with elegance were the challenges of this painting. **A celebrity from the past coming back to life** and gaining attention in our current technology-filled century. Keeping the same style of painting, taking into account the direction of the light and the intention of the original painting are important details to take into account when including a new intention in the communication of the painting.

## Sunshine

**Feminine flair. Dreamy and attractive,** contrast of light and shadow with a single color detail. Delicate sensuality with a striking appeal to inner thoughts. An interesting proposal for wide and pale environments in colors. This painting plays a delicate role in filling these spaces without being invasive.

## Live Green

**Nature around us, as always a living role in our daily lives.** It's a great challenge trying to capture natural colors and shapes. The challenge in this painting: the textures and contrasts contained within the **natural shape of a tree leaf** played an important role.

These paintings adapt to multiple environments: living rooms, food spaces or workplaces, relaxing our eyes and returning to nature.
